Heuristic evaluation summary

Severity: 0 = not a usability problem 1 = cosmetic, 2 = minor usability problem, 3 = major -||-; important to fix, 4 = usability catastrophe

No	Heuristic	Description of the Issue	Screenshot	Severity	Suggested Improvement
1	**H1-1: Simple & natural dialog**	Unchecking the checkbox "Available" only displays unavailable books and not all	Image 1	2	If "Available" is not checked, display all books. When page reloads, default is unchecked (displays all books = not available and available)
2	**H1-2: Speak the users' language**	Loans, reservations and history pages don't have localized author names	Image 2	3	Fix author localizations in loans, reservation and history pages
3	**H1-3: Minimize users' memory load**	-	-	-	-
4	**H1-4: Consistency**	The way errors are displayed is inconsistent between login and register functions	Images 3 and 4	1	Unify error formatting to one or the other
		The interface shows 'logout' but no access to do anything because token has expired. Should say 'login'	Image 5	2	Show login button when no valid token; if user is in profile pages, navigate to front page
5	**H1-5: Feedback**	No alert when reservation is cancelled	No screenshot	2	Add alert of succesful cancellation
		No message or alert of successful sign in	No screenshot	1	Alert or welcome message
		When returning book, alert takes so long it seems like app freezed	No screenshot	2	First return and display alert, then send notification to email or display animation while waiting (loading/spinning wheel)
		If user choose many filters and the search returns no results, there is no clear feedback - just empty search results	Image 6	2	If search returns no results, display a message such as 'No results found'
6	**H1-6: Clearly marked exits**	The menus (language, profile) in nav bar doesn't close when pressed outside of the menu	Image 7	2	Close language menu when language is changed. Close language and profile menu when clicking outside of the menu.
7	**H1-7: Shortcuts**	My page displays info of the subsections, but doesn't offer any shortcuts to those pages	Image 8	2	Make "Current loans: 10" clickable link to the page. Also reservations and favorites
8	**H1-8: Precise & constructive error**	No error message displayed when trying to register with taken email	Image 9	3	Display error message
9	**H1-9: Prevent errors**	No confirmation after loan, return and cancel so there is no undo feature	No screenshot	3	Allow user to cancel loan, reservation, and return after clicking button but before it goes through (add confirmation modal)
10	**H1-10: Help and documentation**	There is no information about the loan duration. Users only sees this after borrowing a book, there is no way to know it beforehand	Image 10	2	The loan duration should also be displayed on the book card when the book is available
10		No help or documentation page available	No screenshot	2	Add info page that includes information about the website, its purpose and has helpful information about things such as loan duration
