Heuristic evaluation summary

All four group members evaluated the website's heuristics individually. Afterward, a meeting was held to compile and analyze the results. The team discussed the findings and selected the most relevant issues to include in the summary table based on their significance.

Severity: 0 = not a usability problem 1 = cosmetic, 2 = minor usability problem, 3 = major -||-; important to fix, 4 = usability catastrophe

No	Heuristic	Description of the Issue	Screenshot	Severity	Suggested Improvement
1	**H1-1: Simple & natural dialog**	Unchecking the checkbox "Available" only displays unavailable books and not all	Image 1	2	If "Available" is not checked, display all books. When page reloads, default is unchecked (displays all books = not available and available)
2	**H1-2: Speak the users' language**	Loans, reservations and history pages don't have localized author names	Image 2	3	Fix author localizations in loans, reservation and history pages
3	**H1-3: Minimize users' memory load**	-	-	-	-
4	**H1-4: Consistency**	The way errors are displayed is inconsistent between login and register functions	Images 3 and 4	1	Unify error formatting to one or the other
		The interface shows 'logout' but no access to do anything because token has expired. Should say 'login'	Image 5	2	Show login button when no valid token; if user is in profile pages, navigate to front page
5	**H1-5: Feedback**	No alert when reservation is cancelled	-	2	Add alert of succesful cancellation
		No message or alert of successful sign in	-	1	Alert or welcome message
		When returning book, alert takes so long it seems like app freezed	-	2	First return and display alert, then send notification to email or display animation while waiting (loading/spinning wheel)
		If user choose many filters and the search returns no results, there is no clear feedback - just empty search results	Image 6	2	If search returns no results, display a message such as 'No results found'
6	**H1-6: Clearly marked exits**	The menus (language, profile) in nav bar doesn't close when pressed outside of the menu	Image 7	2	Close language menu when language is changed. Close language and profile menu when clicking outside of the menu.
7	**H1-7: Shortcuts**	My page displays info of the subsections, but doesn't offer any shortcuts to those pages	Image 8	2	Make "Current loans: 10" clickable link to the page. Also reservations and favorites
8	**H1-8: Precise & constructive error**	No error message displayed when trying to register with taken email	Image 9	3	Display error message
9	**H1-9: Prevent errors**	No confirmation after loan, return and cancel so there is no undo feature	-	3	Allow user to cancel loan, reservation, and return after clicking button but before it goes through (add confirmation modal)
10	**H1-10: Help and documentation**	There is no information about the loan duration. Users only sees this after borrowing a book, there is no way to know it beforehand	Image 10	2	The loan duration should also be displayed on the book card when the book is available
		No help or documentation page available	-	2	Add info page that includes information about the website, its purpose and has helpful information about things such as loan duration
